train, maintain, and provide Special Operations Forces (SOF) in support of the contingency plans developed by provide medium to long range air infiltration/exfiltration aircraft, specially equipped gunships, and aerial United States Special Operations Command (USSOCOM) is a unified command with world-wide responsibilities to Commander-In-Chief Special Operations Command (CINCSOC) will assume command of a special operation anywhere consist of Sea, Air, Land Teams (SEAL) and Special Boat Units (SBU). The Air Force special operation units determining its own force structure and related materiel requirements, procuring the SOF unique equipment, exfiltration aircraft, Civil Affairs (CA) and Psychological Operations (PSYOPS) specialists. Navy forces measurable to Special Operations Commands located at USEUCOM, USCENTCOM, USPACOM, USACOM, USSOUTHCOM, and Korea. USSOCOM is the only operational command within the Department of Defense directly responsible for in the world. USSOCOM's Army forces include Special Forces, Rangers, short to medium range infiltration/ refuel capability. USSOCOM also funds SOF mission and mission support costs specifically identified and the five regionally oriented unified commands; United States European Command (USEUCOM), United States Central Command (USCENTCOM), United States Pacific Command (USPACOM), United States Atlantic Command When directed by the President, the (USACOM), and United States Southern Command (USSOUTHCOM). training and deploying its own units.

## I. DESCRIPTION OF OPERATIONS FINANCED:

# A. OPERATING FORCES - (BUDGET ACTIVITY 1 (BA1))

Includes costs directly associated authorizations, SOF peculiar and support equipment, fielding of SOF equipment, routine operating expenses, with unit training, deployments, and participation in contingency operations. Resources support manpower and necessary facilities. BA1 is divided into two activity groups (i.e., SO Operational Forces and Includes necessary resources for SOF tactical units and organizations. Operational Support):

#### 1. SO Operational Forces

equipment, flying hours, aircraft, necessary facilities, and the associated costs specifically identified and individual unit's operations, training, and spare parts. Four subactivity groups comprise SO Operational Includes Active, Reserve, and Guard Army and Air Force manpower authorizations, SOF peculiar and support measurable to initial qualification and recurring training of aircrews to SOF aviation operations and Includes personnel and operation and maintenance costs that are directly associated with an

#### a. Flight Operations

specifically identified and measurable to SOF Active Tactical Aviation Operational units, organizations, and (352 SOG, RAF Mildenhall UK and 353 SOG, Kadena AB JA) and their associated squadrons. Includes the 919th Includes the 160th Special Operations Aviation Regiment at Ft Campbell, Ky. Funding supports SOF Army and Supports one active Special Operations Wing (16 SOW, Hurlburt Field, FL) and two special operations groups Air Force manpower authorizations, flying hours, SOF peculiar and support equipment, necessary facilities, Special Operations Wing located at Duke Field, FL, and the 193rd Special Operations Group, Harrisburg, PA. initial qualification and recurring training of aircrews in SOF aircraft operations and tactics. Special Operation Wings and squadrons are also included in this subactivity.

#### b. Ship/Boat Operations

Navy manpower authorizations, SOF peculiar and support equipment, necessary facilities, and associated costs Includes Active and Reserve specifically identified and measurable to ships and boats assigned to Naval Special Warfare Command (NSWC). Supports Naval Special Warfare Groups, Special Boat Squadrons, and SEAL Teams.

### c. Combat Development Activities

doctrine, organizational concepts, material requirements, and other development activities related to Special Includes all Joint and Component manpower authorizations, SOF peculiar and support equipment, necessary facilities and the associated costs specifically identified and measurable to the development of combat necessary to develop and/or validate new doctrine, material and organizations for special operations. Operation Forces. Also includes activities to support experimentation, tests, projects, evaluations

#### d. Other Operations

Includes manpower authorizations, SOF peculiar and support equipment, necessary facilities and the associated costs specifically identified and measurable to SOF Active Army Ranger; Active, National Guard, and Reserve Army Special Forces activities; Active and Reserve Army Psychological Operations, Active and Reserve Army Civil Affairs Units; Counter Drug Activities and Operations TEMPO (OPTEMPO), and Active Air Force Special Tactics groups, squadrons, Combat Control squadrons, detachments and SOF Para Rescue Forces.

#### 2. SO Operational Support

#### a. Force Related Training

Provides for the conduct of, or participation in, strategic mobility, major Commander-In-Chief directed, and Theater CINCs and the Services. Includes all Headquarters USSOCOM and/or component manpower authorizations, training (JCET) exercises sponsored by Commander-In-Chief Special Operations Command in support of regional Joint Chiefs of Staff (JCS) exercises. Force related training includes Joint and/or combined exchange

SOF peculiar and support equipment, necessary facilities, and the associated costs specifically identified and measurable to the conduct of force related training in schools performing SOF related training

#### b. Operational Support

costs specifically identified and measurable to SOF Active Army Special Operations Support Command (SOSCOM), Active and Reserve Army Tactical Communications, and other SOF operational support units and organizations. Includes manpower authorizations, SOF peculiar and support equipment, necessary facilities and associated

### c. Intelligence and Communication

equipment, necessary facilities and associated resources directly associated with ADP support costs for the facility controls, and associated equipment. This includes Command Center operations, deployable command, control and communications assets, and automation support required to maintain SOF command and control. Global Command and Control System (GCCS), non-tactical telecommunications networks, services, leases, Includes all Headquarters USSOCOM and/or component manpower authorizations, SOF peculiar and support

#### d. Management/Operational HQ

Also includes costs associated with the expenditure of funds in support of officially sanctioned activities which promotes the goals of CINCSOC and DOD. Additionally supports the Theater Special Operations Commands used to maintain the standing and prestige of the United States by extending official courtesies to guests Includes manpower authorizations, SOF peculiar and support equipment, necessary facilities and associated Command Headquarters of SOF, as well as the USSOCOM Headquarters and it's management support activities. costs specifically identified and measurable to the U. S. Army, Air Force, and Naval USSOCOM Component of SOCACOM, SOCCENT, SOCEUR, SOCPAC, SOCSOUTH, and SOCKOR.

#### e. Depot Maintenance

Supports maintenance (to include installation of modification/conversion kits) of weapons/support systems and commodity groups associated with SOF activities. Includes Headquarters USSOCOM and/or components funds for reimbursement of the industrial funds of each Service for depot maintenance of SOF-unique or SOF-peculiar

Naval shipyards and costs associated with non-industrial funded ship maintenance activities at Navy ship aircraft and equipment. Includes reimbursement for ship maintenance activities at industrially-funded repair facilities.

#### f. Base Support

maintenance and repair of real property, other facilities, pavements, (roads, parking areas, etc.), land, and Military Construction project as established by Section 2805 of Title 10 U.S.C.. Also costs associated with Includes associated cost specifically identified and measurable in support of costs incurred by USSOCOM and conditioning, water piping, and routine maintenance work such as caulking and painting. Base Support costs its components. Provides for all construction costing less than the statutory maximum amount for a Minor grounds. Includes but not limited to, such things as repair of electrical circuitry, heating and air funded are limited to those previously cross-walked to USSOCOM by the Services.

### B. TRAINING (BUDGET ACTIVITY 3 (BA-3))

Bragg, NC provides modularized qualification, advanced enhancement, and limited sustainment medical training special operations schools. United States Special Operations Command (USSOCOM) operates the John F. Kennedy Coronado, California, and the Air Force Special Operations School at Hurlburt Field, FL. Also included are Training Center (JRTC) are directly related to SOF Operations. The SOF Medical Training Facility at Fort Includes resources for operation and maintenance costs directly attributable to supporting the component training development and support activities. The schools and centers provide mobile training teams to SOF Aircrew training and training at the Joint Readiness Special Warfare Center and School at Fort Bragg, North Carolina; the Naval Special Warfare Center at for joint SOF. The facility's first class begins 01 July 1996. support the operational forces as required.

#### 1. Skill and Advanced Training

#### a. Specialized Skill Training

costs of aircraft used in training, and field and organizational maintenance. Also provides for SOF Language operations. Included is the administrative and logistical support of students attending training, operating American and Allied personnel in geopolitical, psychological and military considerations of joint special Provides for the USA JFK Special Warfare Center, Naval Special Warfare Training Center, which educates

This includes proficiency language or refresher language training unless it is included Training, which is related to SOF but closely parallels the language training performed by the Defense in the Defense Language Institute curriculum. Language Institute.

### b. Professional Development Education

The USAFSOS primary mission is Since FY 1994, the school has provided the Commando EDGE Professional Development program which is a progressive education program qualifying AFSOF personnel to serve in joint special operations task forces to provide specialized special operations education for USSOCOM air component personnel and other USSOCOM (JSOTF) and joint staffs. In addition to formal courses offered at the Hurlburt Field facility, USAFSOS conducts off-station tutorials to meet the needs of forces stationed world-wide. Includes the USAF Special Operations School (USAFSOS) at Hurlburt Field, FL.

#### c. Base Support

Provides for base support costs specifically identifiable to the Naval Special Warfare Center. A portion of piping, and routine maintenance work such as caulking and painting. Also costs associated with maintenance and repair of real property, other facilities, pavements, (roads, parking areas, etc.), land, and grounds. but not limited to, such things as repair of electrical circuitry, heating and air conditioning, water previously cross-walked base support funds were specifically transferred to this training center.

## C. ADMINISTRATIVE (BUDGET ACTIVITY (BA-4):

#### 1. Logistics Operations

### a. Acquisition/Program Management

acquisition program management, engineering, and logistical support for SOF tactical acquisition programs. Provides resources for Operation and Maintenance costs supporting SOF peculiar acquisition program being developed or procured. Funding is executed by the Special Operations Acquisition Center (SOAC). Funds Support includes funding for travel, operational testing and evaluation support, related supplies and

Funds civilian program management and general contractor support for the Special Operations Acquisition Center (SOAC) to include support equipment, necessary facilities, SOAC equipment. Also supports various acquisition efforts and civilian acquisition program managers of civilians, and costs associated with the management of SOAC. Intelligence Systems programs.

## UNITED STATES SPECIAL OPERATIONS COMMAND OPERATION AND MAINTENANCE, DEFENSEWIDE

#### Force Structure Summary:

II.

Component headquarters subordinate United States Special Operations Command (USSOCOM), a unified command, plans and programs Active, Reserve to USSOCOM include United States Army Special Operations Command (USASOC), Naval Special Warfare Command (COMNAVSPECWARCOM), Air Force Special Operations Command (AFSOC), the sub-unified operational command of Joint Special Operations/Joint Communications Unit, and the Special Operations Acquisition Center which and Guard manpower to include Army, Navy, Air Force and Marine Corps. administers acquisition/procurement.

training/education requirements unique to the SOF community in its "joint" arena. The Special Operations (AFSOS) and the Joint Readiness Training Center (JRTC). The Joint Special Operations Forces Institute Command Joint Intelligence Center (SOCJIC) was established in 1994 pursuant to a central intelligence programs resources for SOF unique requirements identified in five theater Special Operations Commands Training is provided through the United States Army John F. Kennedy Special Warfare Center and School (JSOFI), as a FY 1995 initiative, used existing resources to amplify the development of doctrine and (JFKSWCS), Naval Special Warfare Center (NSWCEN), United States Air Force Special Operations School USSOCOM plans and restructuring initiative directed by Secretary of Defense Memorandum of 1991. (SOCs) plus the Special Operations Command, Korea.

# III. Financial Summary (O&M: \$ in Thousands):

# D. Reconciliation of Increases and Decreases:

- (4) From BA4, Acquisition Activities for the day-to-day operations of SOCRATES to manage the program.
- (5) Functions of one workyear performed by the United States Army Special Operations Command Protocol Office for the 160th Special Operations Aviation Regiment were transferred to the operational unit as a centralization of work responsibilities.
- (6) Air Force Special Operations Command realigned end strength and workyears (two from Other Operations and eleven from Depot Maintenance) to meet flight operation manning requirements.

  Workforce will support the 18th Flight Test Squadron's Tactics Division, AC-130 Gunship testing, 16th Special Operations Wing and the Air Force Operational Test Center (AFOTEC).
- (7) With the deactivation of Machrihanish, UK host tenant function, workyears were redistributed to meet prioritized shortfalls. Two workyears were realigned for the classified program.
- (8) Naval Special Warfare Group II, as the parent unit, applied two workyears from the Machrihanish deactivation to meet reprioritization of stateside workload. These positions were utilized to correct deficiencies cited by the Inspector General (IG) results promulgated in FY 1995.

# III. Financial Summary (O&M: \$ in Thousands):

# D. Reconciliation of Increases and Decreases:

- (9) Two budget analyst positions were resourced for the Special Operations Support Command. This function is tied to the reorganization of the Combat Support/Combat Service Support which was provisionally activated July 1995 and formally in November 1995. These workyears were realigned from the Management Headquarters to meet this priority and will support the 1/1st and the 1/10th Special Forces Groups.
- (10) Realigned three workyears from United States Army Special Operations Command (Reserve Special Forces) to shortfall areas within United States Army Special Forces Command.
- (11) United States Army Special Operations Command Information Management Detachment was redesignated as a Field Operational Element (FOE). Non-defense Management Headquarters authorization functions/spaces totaling 67 workyears were realigned to centrally support all Major Subordinate Commands.
- (12) The Joint Special Operations Forces Institute is a staff agency within USSOCOM manning. To support validated mission level, realignment of three workyears were effected. One workyear was realigned from Special Operations Command Joint Intelligence Center, one was realigned from Special Operations Acquisition Center (contracting office), and one workyear was offset from within the headquarters element and therefore does not reflect an increase to this subactivity.

# III. Financial Summary (O&M: \$ in Thousands):

# D. Reconciliation of Increases and Decreases:

- (13) A major initiative to restructure United States Army Special Operations Command and its major subordinate commands was endorsed through all official channels and the Defense Management Headquarters Authorization ceiling was revised to incorporate 97 military and 94 civilian workyears. This reorganization was supported by realignment of 74 workyears from John F. Kennedy Special Warfare Center and 20 workyears from United States Special Operations Integration Command.
- (14) Increased participation in the Joint Chief of Staff (JCS) and Joint Combined Exchange Training (JCET) in the PACOM Theater.

571

93

- (15) Increase to minor construction and repair, upgrade of facilities to facilitate the reorganization of the USASOC HQs.
- (16) Increased equipment funding requirements for U. S. Army Special Forces. Purchases fluctuate in accordance with periodic life-cycle replacement requirements.

### b. BA-3 Functional Program Increases

(1) From BA1, Operating Forces. The John F.
Kennedy Special Warfare Center and School was
hardest hit in the application of the Federal
Workforce Restructuring Act in the initial spread
of reductions. Therefore, marginal relief of six
workyears was made through realignment. Four
workyears, the balance of the military technician

# III. Financial Summary (O&M: \$ in Thousands):

# D. Reconciliation of Increases and Decreases:

- (7) Realignment of 20 workyears was in support of the United States Army Special Operations Command Reorganization. Function transferred from Management Headquarters. This eliminated overhead and redundancy and reduced the manning requirement of the United States Army Special Operations Integration Command.
- (8) The 24th Special Tactics Squadron served as partial billpayer for two end strength and workyears realigned to meet Flight Operations workload priority as identified within Air Force Special Operations resources.
- (9) The Federal Workforce Restructuring Act challenged United States Army Special Operations Command with implementing a reduction of 126 workyears. Initially, military technicians were exempt. However, the inactivation of Reserve Special Forces Groups provided reasonable margin to apply a workyear reduction associated with seven (7) vacancies. Workyears were realigned to shortfall areas to include the United States Army Special Forces Command (three (3) workyears) and the John F. Kennedy Center (four (4) workyears) which were inordinately cut during the FY 1996/1997 Budget Estimate submission.
- (10) The United States Army Special Forces Command provided 31 workyears to support the establishment of the above mentioned Field Operating Element.

-1,017

-88

-308

-1,549

# III. Financial Summary (O&M: \$ in Thousands):

# D. Reconciliation of Increases and Decreases:

(11) Internal realignment of United States Special Operations Command (USSOCOM) programmed positions was necessary to meet current priority to bring the Joint Special Operations Forces Institute to validated manning levels. Special Operations Command Joint Intelligence Center (SOCJIC) served as the billpayer for one workyear.

(12) To centralize oversight for intelligence equipment, procurement/acquisition efforts/positions were realigned to Special Operations Acquisition Center to include two workyears from Special Operations Command Joint Intelligence Center.

(13) United States Army Special Operations Command provided two workyears as the offset to support the Special Operations Support Command and one workyear for the 160th Special Operations Aviation Regiment protocol function transfer.

(14) United States Special Operations Command (USSOCOM) Headquarters reflects a realignment of five workyears to the Special Operations Acquisition Center for the oversight of intelligence equipment procurement and acquisition efforts.

-59

-120

-148

-294

# III. Financial Summary (O&M: \$ in Thousands):

# D. Reconciliation of Increases and Decreases:

(15) This reflects the realignment of 11 Air Logistics Command workvears to support flight	operations for Air Force Special Operations	Command. Projected execution provides for the	realignment to the priority workload at the 18th	Flight Test Squadron without a negative impact to	Warner Robins Air Logistic Center (WR-ALC) manning.
--	---	---	--	---	---

(16) Deactivation of Machrihanish, UK host tenant function with realignment of two workyears to Naval Special Warfare Group II and two workyears to Naval Combat Development Activities.

(17) Reductions to USSOCOM component HQs supplies and material due to revised economic assumptions.

(18) Contractor logistics support for the MH-47E and MH-60K models reduced from initial projection within the Army Aviation program at the 160th Special Operations Aviation Regiment.

### b. BA-3 Functional Program Decreases

(1) To BA1, Operating Forces. The John F. Kennedy Special Warfare Center was decremented 74 workyears to meet the functional realignment identified in the United States Army Special Operations Command reorganization. An additional 36 workyears were used to establish the Field Operating Element which centrally controls administrative, personnel, and logistics support to the major command proponent offices.

# D. Reconciliation of Increases and Decreases:

### 9. Functional Program Transfers In

- a. From Procurement, Defensewide, for Contractor Logistics Support (CLS) of Special Operations Forces Planning and Rehearsal System (SOFPARS). The number of CLS technicians increases to ensure necessary duties as systems administration, hardware maintenance, and refresher training are performed. Supported system includes 132 Portable Mission Planning Systems (PMPS), 70 desktop systems, and 18 base stations for a total of 220 systems. SOFPARS is a mission planning and Rehearsal 1 system, integrated with an extensive database and used in planning national taskings.
- b. From Procurement, Defensewide, for post-production engineering support on 24 Combat Talon II (MC-130H) aircraft. Supports contractor maintenance expertise, updating of drawings and specifications, coordination of materiel or hardware changes, analysis of problems and possible product improvements. Although airframe production is complete, this type of engineering support must be in place to facilitate a smooth transition to operations. MC-130H supports Air Force Special Operations Command's (AFSOC) need for covert infiltration and exfiltration.
- c. From Procurement, Defensewide, for support of Radio Frequency Mobile Electronic Test Set (RFMETS) program. This increase provides: integrated program milestone schedule support; contractor logistics functional support; Military Standard Requisitioning and Issuing Procedure (MILSTRIP); Government Furnished Equipment (GFE) tracking and status; Integrated

1,053

2,390

1,327

III. Financial Summary (O&M: \$ in Thousands):

# D. Reconciliation of Increases and Decreases:

Product Team (IPT) overhead for database management; suspense tracking; and administrative support. RFMETS will improve AFSOC's logistics posture by providing intermediate and depot level test equipment.

ASOCNET hardware and software with the goal of fielding contractor expertise, and maintenance on the system, as significantly improve operations through the secure and it is fielded earlier than originally planned. ASOCNET of a Command Automation Center (CAC), capable of E-Mail is a series of local area networks under the direction This more aggressive procurement approach has likewise the system by FY 1997, to improve command and control. ASOCNET will acceleration. USASOC has accelerated procurement of processing, entering the Defense Data Network (DDN), d. From Procurement, Defensewide, for Army Special increased requirements for program office support, Operations Command Network (ASOCNET) program and accessing other government systems. reliable exchange of information. e. From Procurement, Defensewide, for SOF Center of Software Integration (CSI). Funds will make the SOF CSI fully capable of supporting the Combat Talon II flight program software in preparation for future software upgrades. This allows the center to be fully operational as we finish the fielding of the Combat TALON II.

1,000

2,316

# III. Financial Summary (O&M: \$ in Thousands):

# ). Reconciliation of Increases and Decreases:

1,986

f. From Procurement, Defensewide, for program office and contractor support requirements and maintenance driven by the fielding of an additional 11 Joint Bases Stations (JBS) in FY 1997. JBS will provide SOF with continuous, reliable, long-range communications among SOF component commands while allowing for differences in missions. JBS will contain line-of-sight (LOS), beyond LOS radios, and associated message handling and switching equipment, and provide for command and control through voice, imagery, data, and facsimile media.

g. From Procurement, Defensewide, for supporting program office expenses and contractor services associated with increased production of the Mark V Special Operations Craft (MK V SOC). MK V SOC will be in full-rate production in FY 1997, when six craft, support equipment, and pre-planned weapons improvements will be procured and fielded, a three-fold increase over the FY 1996 production rate. MK V SOC satisfies Naval Special Warfare Command's mission requirement for a medium range, insertion/extraction, and coastal patrol and interdiction (CP&I) platform deployable worldwide.

# III. Financial Summary (O&M: \$ in Thousands):

# D. Reconciliation of Increases and Decreases:

- h. From Procurement, Defensewide, for travel and contractor support expenses on the Integrated Survey Program (ISP). ISP will acquire 11 suites of standard survey equipment to be fielded to each theater and special teams for improved intelligence-compatible laptop computers with computer-assisted design software, electronic filmless cameras, 8mm video cameras, global positioning system receivers, and laser rangefinders.
- i. From Procurement, Defensewide, for System Engineering and Technical Analysis (SETA) support to the System Acquisition Managers (SAMs) of the Osprey (CV-22) and the Rigid Inflatable Boat (RIB) programs.
- j. From RDT&E, Defensewide, to sustain the M4 Carbine and its accessory kit, which begins fielding in late FY 1996.
- k. From RDT&E, Defensewide, to fund the replacement of the current MK 24 full face mask. The replacement mask has a drinking tube which allows divers to hydrate while submerged. This deficiency impairs their mission performance. The incorporation of a drinking tube will improve the combat diver performance by allowing divers to drink while performing missions.

TOTAL	-11	-808	1057	138	302

The overall Flying Hour program decreases from 33,682 hours (FY96) to 32,874 hours (FY97), however, there is an increase in required funding. This is due to the increase in program hours for the more expensive platforms; MH-47E and MH-60K. Presently, pilots are transitioning to the MH-47E and MH-60K aircraft. For all MH-47E and MH-60K crews, New Equipment Training (NET) is required in order to initially qualify pilots and crew members on the new airframes. Transition training blocks will be ongoing during FY96 and FY97. This fielding of the more task-intensive aircraft necessitates this increase in

UNITED STATES SPECIAL OPERATIONS COMMAND OPERATION AND MAINTENANCE, DEFENSEWIDE FY 1997 BUDGET ESTIMATES

## III. Financial Summary (O&M: \$ in Thousands):

### D. Reconciliation of Increases and Decreases:

transition hours. The increase in the number of pilots requires more sustainment training. The higher 1.5 crew ratio phase-in plan began in 4th quarter FY95 and will be fully implemented by 4th quarter FY97. These additional pilots create a greater training requirement as well as increased aircraft utilization rates. This increases the required FY97 utilization rate for the MH-47Es and MH-60Ks. The mission support requirements provided by the older aircraft (MH-47D and MH-60A/L) are assumed by the more modern MH-47E and MH-60K.

technical service to support TALON I flying hour OPTEMPO increase. TALON I avionics require engineering technical support to modify, update, and provide configuration management of existing hardware. Funding also supports additional travel and supply requirements related to OPTEMPO growth.

#### (e) Depot Maintenance

232

(1) Increased maintenance requirements for the Special Operations Media Systems B (SOMS B). The warranty period expires in FY97 for the first fielded system. SOMS B is a Psychological Operations Transmission System that includes a mobile radio broadcast subsystem, a mobile television broadcast subsystem, a mobile television broadcast subsystem. SOMS B broadcasts gathering subsystem. SOMS B broadcasts PSYOP radio and TV information from fixed or mobile locations.

(2) Funds increase to support the engineering support for Ammo/Pyro/Demo and small arms programs. Continued introduction of sophisticated weapons and munitions requires additional documentation and engineering support to maintain technical manuals, drawings and configuration management. Also funds critical SOF peculiar materials and supplies which are not available through Service supply channels, such as night optics/ weapons/communication equipment.

### D. Reconciliation of Increases and Decreases:

of drawings and specifications, coordination of materiel or hardware changes, and analysis of problems and possible product improvements. Although airframe production is complete, this type of engineering support must be in place to facilitate a smooth transition to operations. AC-130U provides SOF with advanced tactical strike capabilities.

(3) Provides Army Special Operations Command Network (ASOCNET) with continued support during acquisition and fielding of system. Funds provide for program office support, contractor expertise, and maintenance on the system. ASOCNET is a series of local area networks under the direction of a Command Automation Center (CAC), capable of E-Mail processing, entering the Defense Data Network (DDN), and accessing other government systems. ASOCNET will significantly improve operations through the secure and reliable exchange of information.

(4) Centralized sustainment at the Special Operations Acquisition Center (SOAC) for maintenance for the Family of Loudspeakers systems being fielded in FY 1997.

3,200

## III. Financial Summary (O&M: \$ in Thousands):

### D. Reconciliation of Increases and Decreases:

480

(5) Funds the increased requirement for program office, contractor support and sustainment related to an additional 4 Special Mission Media System B (SOMS B) being fielded in FY 1997. SOMS B is a deployable electronic news systems, which receives and transmits radio and TV signals and is capable of being driven on and off a C-130. It replaces 1950-60s technology and enhances SOF's ability to conduct tactical level psychological operations in support of regional unified commanders.

support for SILENT SHIELD during fielding of 7 systems in FY 1997. SILENT SHIELD is designed to enhance SOF aircrew situational awareness and to provide threat warning information. The system consists of two briefcases (one with the communications surveillance system, the other with the tactical data receiver) and an installed aircraft kit (hatch-mounted and removable antennas and associated wiring).

(7) Increase for SOF Laser Marker (SOFLAM). Provides initial logistical support for SOFLAM units being fielded in FY 1997. SOFLAM is a hand-held device used to guide precision munitions to target.

217

## III. Financial Summary (O&M: \$ in Thousands):

### D. Reconciliation of Increases and Decreases:

30

(8) Funds the balance of the funding required to the current MK 24 full face mask. The replacement mask has a drinking tube which allows divers to hydrate while submerged. This deficiency impairs their mission performance. The incorporation of a drinking tube will improve the combat diver performance by allowing divers to drink while performing missions. This increase, combined with a Functional Transfer of \$199K from RDT&E, will ensure the deficiency is corrected.

(9) Provides System Engineering and Technical Analysis (SETA) support to the System Acquisition Managers (SAMs) of the Osprey (CV-22) and the Rigid Inflatable Boat (RIB) programs. This increase, combined with a Functional Transfer of \$206K from Procurement, supports the requirement.

154

### (b) Program Realignments

(1) Realigned from BA1, Naval Special Warfare Command, for the SOF Laser Marker (SOFLAM). Provides initial logistical support for SOFLAM units being fielded in FY 1997.

(2) Realignment from BA1 for appropriate management oversight of the SOF Offensive Handgun program.

# III. Financial Summary (O&M: \$ in Thousands):

## D. Reconciliation of Increases and Decreases:

- d. From BA4, Acquisition Activities for the day-to-day operations of SOCRATES to manage the program.
- e. Functions of one workyear performed by the United States Army Special Operations Command Protocol Office for the 160th Special Operations Aviation Regiment were transferred to the operational unit as a centralization of work responsibilities.
- f. Air Force Special Operations Command realigned end strength and workyears (two from Other Operations and eleven from Depot Maintenance) to meet flight operation manning requirements. Workforce will support the 18th Flight Test Squadron's Tactics Division, AC-130 Gunship testing, 16th Special Operations Wing and the Air Force Operational Test Center (AFOTEC).
- g. With the deactivation of Machrihanish, UK host tenant function, workyears were redistributed to meet prioritized shortfalls. Two workyears were realigned for the classified program.
- h. Naval Special Warfare Group II, as the parent unit, applied two workyears from the Machrihanish deactivation to meet reprioritization of stateside workload. These positions were utilized to correct deficiencies cited by the Inspector General (IG) results promulgated in FY 1995.

2,177

50

574

63

# III. Financial Summary (O&M: \$ in Thousands):

## D. Reconciliation of Increases and Decreases:

- i. Two budget analyst positions were resourced for the Special Operations Support Command. This function is tied to the reorganization of the Combat Support/Combat Service Support which was provisionally activated July 1995 and formally in November 1995. These workyears were realigned from the Management Headquarters to meet this priority and will support the 1/1st and the 1/10th Special Forces Groups.
- j. Realigned three workyears from United States Army Special Operations Command (Reserve Special Forces) to shortfall areas within United States Army Special Forces Command.
- k. United States Army Special Operations Command Information Management Detachment was redesignated as a Field Operational Element (FOE). Non-defense Management Headquarters authorization functions/spaces totaling 67 workyears were realigned to centrally support all Major Subordinate Commands.
- 1. The Joint Special Operations Forces Institute is a staff agency within USSOCOM manning. To support validated mission level, realignment of three workyears were effected. One workyear was realigned from Special Operations Command Joint Intelligence Center, one was realigned from Special Operations Acquisition Center (contracting office), and one workyear was offset from within the headquarters element and therefore does not reflect an increase to this subactivity.

98

148

3,232

# III. Financial Summary (O&M: \$ in Thousands):

## D. Reconciliation of Increases and Decreases:

m. A major initiative to restructure United States Army Special Operations Command and its major subordinate commands was endorsed through all official channels and the Defense Management Headquarters Authorization ceiling was revised to incorporate 97 military and 94 civilian workyears. This reorganization was supported by realignment of 74 workyears from John F. Kennedy Special Warfare Center and 20 workyears from United States Special Operations Integration Command.

n. Increased participation in the Joint Chief of Staff (JCS) and Joint Combined Exchange Training (JCET) in the PACOM Theater.

o. Increase to minor construction and repair, upgrade of facilities to facilitate the reorganization of the USASOC HQs.

p. Increased equipment funding requirements for U. S. Army Special Forces. Purchases fluctuate in accordance with periodic life-cycle replacement requirements.

Total Functional Program Increases

- 6. Functional Program Decreases
- a. To BA4, Acquisition Activities, for program support for the Special Mission Radio System.

93

1,815

15,065

# III. Financial Summary (O&M: \$ in Thousands):

## D. Reconciliation of Increases and Decreases:

b. To BA4, Acquisition Activities, for logistics and engineering support for MH-53 Interactive Defense Avionics System/Multi-Mission Advanced Tactical

- c. To BA4, Acquisition Activities for appropriate management oversight of the program.
- d. To BA4, Acquisition Activities for COMBAT TALON II Systems Engineering and Technical Analysis (SETA) support.
- e. To BA4, Acquisition Activities for MARK V System Engineering and Technical Analysis (SETA) support.
- f. Two United States Army Special Operations Command positions initially targeted to provide support for the SOFPREP function at Hurlburt Field Air Force installation were exchanged for military support to accommodate ease of payroll systems.
- g. Realignment of 20 workyears was in support of the United States Army Special Operations Command Reorganization. Function transferred from Management Headquarters. This eliminated overhead and redundancy and reduced the manning requirement of the United States Army Special Operations Integration Command.

-1,017

# III. Financial Summary (O&M: \$ in Thousands):

## D. Reconciliation of Increases and Decreases:

h. The 24th Special Tactics Squadron served as partial billpayer for two end strength and workyears realigned to meet Flight Operations workload priority as identified within Air Force Special Operations resources.

i. The Federal Workforce Restructuring Act challenged United States Army Special Operations Command with implementing a reduction of 126 workyears. Initially, military technicians were exempt. However, the inactivation of Reserve Special Forces Groups provided reasonable margin to apply a workyear reduction associated with seven (7) vacancies. Workyears were realigned to shortfall areas to include the United States Army Special Forces Command (three (3) workyears) and the John F. Kennedy Center (four (4) workyears) which were inordinately cut during the FY 1996/1997 Budget Estimate Submission.

j. The United States Army Special Forces Command provided 31 workyears to support the establishment of the above mentioned Field Operating Element.

-308

-88

-1,549

# III. Financial Summary (O&M: \$ in Thousands):

## D. Reconciliation of Increases and Decreases:

k. Internal realignment of United States Special Operations Command (USSOCOM) programmed positions was necessary to meet current priority to bring the Joint Special Operations Forces Institute to validated manning levels. Special Operations Command Joint Intelligence Center (SOCJIC) served as the billpayer for one workyear.

1. To centralize oversight for intelligence equipment, procurement/acquisition efforts/positions were realigned to Special Operations Acquisition Center to include two workyears from Special Operations Command Joint Intelligence Center.

m. United States Army Special Operations Command provided two workyears as the offset to support the Special Operations Support Command and one workyear for the 160th Special Operations Aviation Regiment protocol function transfer.

n. United States Special Operations Command (USSOCOM) Headquarters reflects a realignment of five workyears to the Special Operations Acquisition Center for the oversight of intelligence equipment procurement and acquisition efforts.

-59

-120

-148

-294

# III. Financial Summary (O&M: \$ in Thousands):

## D. Reconciliation of Increases and Decreases:

p. Deactivation of Machrihanish, UK host tenant function with realignment of two workyears to Naval Special Warfare Group II and two workyears to Naval Combat Development Activities.

q. Reductions to USSOCOM component HQs supplies and material due to revised economic assumptions.

r. Contractor logistics support for the MH-47E and MH-60K models reduced from initial projection within the Army Aviation program at the 160th Special Operations Aviation Regiment.

(4) Additional training for Army Special	Forces Command National Guard personnel in	areas such as High Altitude/Low Opening	parachute jumping, SCUBA certification and	validation, and combat training.

1,370

(5) Collateral equipment purchases for newly completed MILCON projects including the SEAL Team Operations support building at Naval Amphibious Base, Coronado (P-191) and the Naval Special Warfare Unit One Operations support building in Guam (P-395). Collateral equipment includes such items as shelving, cabinets, small parts storage, tool lockers, test equipment, file cabinets, safes, book cases, hoists, lifts, workbenches, etc.

delivered Mark Sixteen Underwater Breathing Apparatus. Funding supports five of these mixed gas breathing systems at a cost of \$35K per system. Requirements include the operational cost, daily maintenance and repair of these diving rigs. These new systems require a completely different storage of repair parts and supplies than the previous apparatus.

175

# III. Financial Summary (O&M: \$ in Thousands):

## D. Reconciliation of Increases and Decreases:

(7) Supplies and equipment including helmets, parachutes, and SCUBA gear for training and real world missions accomplished by Air Force Special Operations Forces. Funds are required for the Special Tactics Forces. Inventory for these forces has been inadequate and needs to be established. These units do not have all their unit equipment to perform the full spectrum of their mission essential tasks. This will provide the Special Tactics Units the equipment to train and perform their mission.

configuration/installation costs for weapon Kuwait; 72 vehicles are assigned to the 5th SFG, and 24 are stored at the Anniston Army Forces Mobility vehicles. Initial vehicles etc.; storage costs at Anniston Army Depot, Fielded to 3rd Special Forces Group (SFG), (8) Increase for fuel and repair parts in vehicles will be fielded to Anniston army which has 24 vehicles in CONUS. The 3rd mounts, radio mounts, antennas, cables, Depot during FY 1997 for storage. The SFG has 72 vehicles pre-positioned in shipment of company vehicle sets from support of the fielding of 72 Special Depot in FY 1996. An additional 96 increase in funding supports

# III. Financial Summary (O&M: \$ in Thousands):

D. Reconciliation of Increases and Decreases:

Anniston to Special Forces units, contract maintenance augmentation for vehicles fielded in FY 1996, and fuel costs and consumables/repair parts for vehicles fielded in FY 1996 and FY 1997.

Total Other Operations

11,465

- (2) Special Operations Operational Support
- (a) Force Related Training

(1) Active Army Special Operations Forces require additional equipment for exercise participation and funding to transport that equipment (\$46K). Army Reserve Special Operations Forces require an increase (\$106K) for participation in the Joint Combined Exchange Training (JCET) Program in the EUCOM Theater. In FY 1997, EUCOM's JCET program increases significantly and reservist participation will increase from 20 to 40 personnel. An additional increase (\$11K) is required for Army Special Operations National Guard forces for travel of additional participating in

192

# III. Financial Summary (O&M: \$ in Thousands):

## D. Reconciliation of Increases and Decreases:

CENTCOM JCET exercises, and increased participation in cyclical JCS exercises requires an increase (\$29K) in funding.

163

(2) Increased participation by Naval Special Warfare Forces in the Pacific and Atlantic has resulted in increased costs for transportation of equipment, per diem, travel, and consumable supplies. Naval Special Warfare forces will be participating in two additional exercises in the PACOM theater; two additional exercises in the CENTCOM theater, and one additional exercise in the EUCOM theater.

Total Force Related Training

(b) Operational Support

(1) Organizational realignment due to the deactivation of the Theater Army Special Operations Support Commands requires increased travel to support geographically separated units. The reduction of the support structure overseas is more reliant on CONUS based capability.

(2) Increase in unit level sustainment and supplies/DLA managed items to support operational readiness for the Army Special

- D. Reconciliation of Increases and Decreases:
- 1. FY 1996 President's Budget Request

37,052

261

- 2. Functional Program Increases
- a. From BA1, Operating Forces. The John F. Kennedy Special Warfare Center and School was hardest hit in the application of the Federal Workforce Restructuring Act in the initial spread of reductions. Therefore, marginal relief of six (6) workyears was made through realignment. Four (4) workyears, the balance of the military technician vacancies, was provided as an offset and two (2) workyears were redirected from the SOFPREP program subsequently supported by military manpower.

Total Functional Program Increases

- 3. Functional Program Decreases
- a. To BA1, Operating Forces. The John F. Kennedy Special Warfare Center was decremented 74 workyears to meet the functional realignment identified in the United States Army Special Operations Command reorganization. An additional 36 workyears were used to establish the Field Operating Element which centrally controls administrative, personnel, and logistics support to the major command proponent offices.

UNITED STATES SPECIAL OPERATIONS COMMAND OPERATION AND MAINTENANCE, DEFENSEWIDE FY 1997 BUDGET ESTIMATES

# III. Financial Summary (O&M: \$ in Thousands):

### ). Reconciliation of Increases and Decreases:

replacement costs. Yuma's superior climate allows for increased quantity, quality, and frequency of airborne operations. Airborne operations will increase from 22 jumps per person to 40 jumps per person.

Costs include This was part of the coordinated initiative (+23 July 1996. Increased funding supports one instructors, travel for Clinic Proficiency Forces Medical Sergeant Course. The SOMTC Special Operations Medical Training Center medical course of instruction, the Special Bragg. Classes are scheduled to begin in train all SOF medical personnel: Special Praining, ambulance rotations, equipment, Medical Training Center (SOMTC) and a new military/+1 civilian) to consolidate all (2) Increase for the Special Operations has a new medical training curriculum. full year of operation. The SOMTC will Forces medics, Navy SEAL corpsmen, and position from Medical Command (Army). reflects the transfer of one civilian Operations Forces Basic Medic at Fort medical supplies, and vehicle rental. Sergeants (18D) and for the Special training of Special Forces Medical AFSOC para-rescue personnel.

OP-5/BA-3

UNITED STATES SPECIAL OPERATIONS COMMAND OPERATION AND MAINTENANCE, DEFENSEWIDE FY 1997 BUDGET ESTIMATES

# III. Financial Summary (O&M: \$ in Thousands):

### D. Reconciliation of Increases and Decreases:

179

(3) The Regional Studies course increases from 64 students in FY 1996 to 177 in FY 1997, resulting in increased travel requirements for instructors and students. Training is required to meet the needs of the many missions taking place OCONUS in different regional areas. SOF personnel must be prepared to operate in these environments.

(4) Increased combatant craft inventory in the school to train Naval Special Warfare Forces requires associated fuel, and non-depot level maintenance and repair.

74

Total Specialized Skill Training

(b) Base Support

(1) Increase for maintenance/repair of the SOF Air Operations Training Facility. The facility is used primarily for the Static Line Jump Master course conducted by the Naval Special Warfare Center. The Static Line Jump Master course has up to 960 students a year. The facility must be climate-controlled to protect equipment and increase habitability. Temperatures at the location's desert climate range from below

# III. Financial Summary (O&M: \$ in Thousands):

### D. Reconciliation of Increases and Decreases:

- e. To BA-1 for the day-to-day operations of SOCRATES to manage the program.
- f. Reduction to COMBAT TALON II fielding decreases as Site Activation Task Force (SATF) Activity ends.

#### Total Decreases

- 6. FY 1996 Current Estimate
- 7. Functional Program Transfers In
- a. From Procurement, Defensewide, for Contractor Logistics Support (CLS) of Special Operations Forces Planning and Rehearsal System (SOFPARS). The number of CLS technicians increases to ensure necessary duties as systems administration, hardware maintenance, and refresher training are performed. Supported system includes 132 Portable Mission Planning Systems (PMPS), 70 desktop systems, and 18 base stations for a total of 220 systems. SOFPARS is a mission planning and Rehearsal 1 system, integrated with an extensive database and in planning national taskings.
- b. From Procurement, Defensewide, for post-production engineering support on 24 Combat Talon II (MC-130H) aircraft. Supports contractor maintenance expertise, updating of drawings and specifications, coordination of materiel or hardware changes, analysis of problems

40,696

1,053

2,390

# III. Financial Summary (O&M: \$ in Thousands):

### D. Reconciliation of Increases and Decreases:

and possible product improvements. Although airframe production is complete, this type of engineering support must be in place to facilitate a smooth transition to operations. MC-130H supports Air Force Special Operations Command's (AFSOC) need for covert infiltration and exfiltration.

- c. From Procurement, Defensewide, for support of Radio Frequency Mobile Electronic Test Set (RFMETS) program. This increase provides: integrated program milestone schedule support; contractor logistics functional support; Military Standard Requisitioning and Issuing Procedure (MILSTRIP); Government Furnished Equipment (GFE) tracking and status; Integrated Product Team (IPT) overhead for database management; suspense tracking; and administrative support. RFMETS will improve AFSOC's logistics posture by providing intermediate and depot level test equipment.
- d. From Procurement, Defensewide, for Army Special Operations Command Network (ASOCNET) program acceleration. USASOC has accelerated procurement of ASOCNET hardware and software with the goal of fielding the system by FY 1997, to improve command and control. This more aggressive procurement approach has likewise increased requirements for program office support, contractor expertise, and maintenance on the system, as it is fielded earlier than originally planned. ASOCNET is a series of local area networks under the direction of a Command Automation Center (CAC), capable of E-Mail

1,327

000,

# III. Financial Summary (O&M: \$ in Thousands):

### D. Reconciliation of Increases and Decreases:

processing, entering the Defense Data Network (DDN), and accessing other government systems. ASOCNET will significantly improve operations through the secure and reliable exchange of information.

- e. From Procurement, Defensewide, for SOF Center of Software Integration (CSI). Funds will make the SOF CSI fully capable of supporting the Combat Talon II flight program software in preparation for future software upgrades. This allows the center to be fully operational as we finish the fielding of the Combat TALON II.
- f. From Procurement, Defensewide, for program office and contractor support requirements and maintenance driven by the fielding of an additional 11 Joint Bases Stations (JBS) in FY 1997. JBS will provide SOF with continuous, reliable, long-range communications among SOF component commands while allowing for differences in missions. JBS will contain line-of-sight (LOS), beyond LOS radios, and associated message handling and switching equipment, and provide for command and control through voice, imagery, data, and facsimile media.
- g. From Procurement, Defensewide, for supporting program office expenses and contractor services associated with increased production of the Mark V Special Operations Craft (MK V SOC). MK V SOC will be in full-rate production in FY 1997, when six craft, support equipment, and pre-planned weapons improvements will be procured and fielded, a three-fold increase over the FY 1996 production rate. MK V SOC satisfies

2,316

1,986

#### \$ in Thousands): Financial Summary (O&M: III.

### Reconciliation of Increases and Decreases: Ď.

Naval Special Warfare Command's mission requirement for patrol and interdiction (CP&I) platform deployable a medium range, insertion/extraction, and coastal worldwide.

- cameras, global positioning system receivers, and laser Program (ISP). ISP will acquire 11 suites of standard contractor support expenses on the Integrated Survey special teams for improved intelligence-compatible survey equipment to be fielded to each theater and h. From Procurement, Defensewide, for travel and software, electronic filmless cameras, 8mm video laptop computers with computer-assisted design rangefinders.
- (CV-22) and the Rigid Inflatable Boat (RIB) programs, Engineering and Technical Analysis (SETA) support to the System Acquisition Managers (SAMs) of the Osprey i. From Procurement, Defensewide, for System
- and its accessory kit, which begins fielding in late FY j. From RDT&E, Defensewide, to sustain the M4 Carbine 1996.
- while submerged. This deficiency impairs their mission k. From RDT&E, Defensewide, to fund the replacement of the current MK 24 full face mask. The replacement mask performance. The incorporation of a drinking tube will improve the combat diver performance by allowing divers has a drinking tube which allows divers to hydrate to drink while performing missions.

for the Combat Talon II as it is delivered to AFSOC. MRD provides combat commanders (1) Covers installation, on-site testing, simulated, yet highly realistic mission and initial contractor logistic support (CLS) of Mission Rehearsal Device (MRD) rehearsals.

Supports contractor maintenance expertise, updating production of 13 aircraft ends and system engineering and configuration control for (2) Provides post-production engineering support to AC-130U Gunship program as coordination of materiel or hardware the Infrared Detection Set (IDS). enters operations; also supports of drawings and specifications,

6,358

990

# III. Financial Summary (O&M: \$ in Thousands):

### D. Reconciliation of Increases and Decreases:

changes, and analysis of problems and possible product improvements. Although airframe production is complete, this type of engineering support must be in place to facilitate a smooth transition to operations. AC-130U provides SOF with advanced tactical strike capabilities.

3,200

(3) Provides Army Special Operations Command Network (ASOCNET) with continued support during acquisition and fielding of system. Funds provide for program office support, contractor expertise, and maintenance on the system. ASOCNET is a series of local area networks under the direction of a Command Automation Center (CAC), capable of E-Mail processing, entering the Defense Data Network (DDN), and accessing other government systems. ASOCNET will significantly improve operations through the secure and reliable exchange of information.

225

(4) Centralized sustainment at the Special Operations Acquisition Center (SOAC) for maintenance for the Family of Loudspeakers systems being fielded in FY 1997.

(160)

# III. Financial Summary (O&M: \$ in Thousands):

### . Reconciliation of Increases and Decreases:

480

(5) Funds the increased requirement for program office and contractor support and sustainment related to an additional 4
Special Mission Media System B (SOMS B)
being fielded in FY 1997. SOMS B is a deployable electronic news systems, which receives and transmits radio and TV signals and is capable of being driven on and off a C-130. It replaces 1950-60s technology and enhances SOF's ability to conduct tactical level psychological operations in support of regional unified commanders.

support for SILENT SHIELD during fielding of 7 systems in FY 1997. SILENT SHIELD is designed to enhance SOF aircrew situational awareness and to provide threat warning information. The system consists of two briefcases (one with the communications surveillance system, the other with the tactical data receiver) and an installed aircraft kit (hatch-mounted and removable antennas and associated wiring).

(7) Increase for SOF Laser Marker (SOFLAM). Provides initial logistical support for SOFLAM units being fielded in FY 1997. SOFLAM is a hand-held device used to guide precision munitions to target.

217

(19)

OP-5/BA-4

### UNITED STATES SPECIAL OPERATIONS COMMAND OPERATION AND MAINTENANCE, DEFENSEWIDE

# III. Financial Summary (O&M: \$ in Thousands):

### D. Reconciliation of Increases and Decreases:

30

(8) Funds the balance of the funding required to the current MK 24 full face mask. The replacement mask has a drinking tube which allows divers to hydrate while submerged. This deficiency impairs their mission performance. The incorporation of a drinking tube will improve the combat diver performance by allowing divers to drink while performing missions. This increase, combined with a Functional Transfer of \$199K from RDT&E, will ensure the deficiency is corrected.

(9) Provides System Engineering and Technical Analysis (SETA) support to the System Acquisition Managers (SAMs) of the Osprey (CV-22) and the Rigid Inflatable Boat (RIB) programs. This increase, combined with a Functional Transfer of \$206K from Procurement, supports the requirement.

### (b) Program Realignments

(1) Realigned from BA1, Naval Special Warfare Command, for the SOF Laser Marker (SOFLAM). Provides initial logistical support for SOFLAM units being fielded in FY 1997.

154

# III. Financial Summary (O&M: \$ in Thousands):

## D. Reconciliation of Increases and Decreases:

(2) Realignment from BA1 for appropriate management oversight of the SOF Offensive Handoun program.	155
(3) Realigned from BA1, for contractor support of IDAS/MATT.	53
(4) Realigned from BA1 for Special Operations Forces small arms and weapons.	178
(5) Realigned from BA1 for one workyear for the Head of Policy and Integration position. Funding was realigned from Management Headquarters subactivity.	62
(6) Realigned from BA1 for Osprey (CV-22) program. Funds provide program office with necessary contractor support.	200
